VEHICLE

2014 Ford Transit Connect

Customer concern
Pulsation in the brake pedal above about 40 mph under light braking. Front pads near the wear indicators. Rear left squeaks for the first few stops in the morning.

Customer request
Call before replacing rear shoes.

#	Type	Description	Cond.	Qty	Unit price	Amount
1	Part	Brake pad set, front, ceramic	New	1	64.95	64.95
2	Part	Brake rotor, front	New	2	72.50	145.00
3	Part	Brake hardware kit, front	New	1	14.95	14.95
4	Labor	Front brakes: replace pads and both rotors, install new hardware kit. Rear brakes: inspect shoes and drums, clean and adjust both sides, grease backing plate contact points. Road test.		1.9 hr	115.00	218.50
5	Supplies	Shop supplies		1	12.00	12.00

TECHNICIAN NOTES

1. Front rotors measured 0.004 in runout, the cause of the pedal pulsation. Replaced front pads (ceramic), both front rotors and the hardware kit.
2. Rear shoes measure about 3.5 mm and drums are within spec. No parts needed. Cleaned and adjusted both sides and greased the backing plate contact points, which was the source of the squeak.
3. Road tested after repair. Pedal is smooth.

Parts	224.90
