Monthly energy use (kWh), last 13 billing periods

Summer prices are in effect

Summer prices apply to bills for May, June, September and October. Summer peak prices apply to July and August. Late June brought an Excessive Heat Warning to the Valley, and cooling was most of this bill. Set the thermostat to 78°F or higher when you are home and close west-facing blinds in the afternoon.

Keep this portion for your records. You are on AutoPay.

Ways to save in the heat

- Pre-cool the house in the morning, then raise the thermostat in the afternoon.
- Change the AC filter every one to three months in summer.
- Ceiling fans let you raise the thermostat about 4°F without feeling warmer. Turn them off when you leave the room.
- See your usage by the hour at srpnet.com. Hourly data is updated each morning.

Questions about your bill? Call (602) 555-0110, 24 hours a day, or visit srpnet.com. To report an outage, call (602) 555-0110 and choose option 1. SRP is a community-based, not-for-profit public power utility.
